## Technical Method & Tips

**\*Tips #1:** Use milk cotton yarn/acrylic yarn for skin part to get the desired 'fluffiness' effect, and use soft cotton yarn to do the other parts so it won't come out hairy.

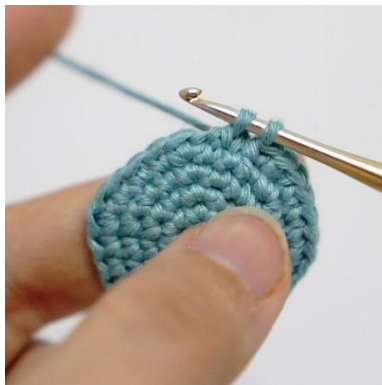

**\*Tips #2:** You have to crochet the stitches tightly with smaller number of hook suggested for the yarn to achieve smooth doll surface with small pores.

**\*Tips #3:** Fill the doll with as much poly-fibre as you possibly can, in order to make the doll firm.

### How to decrease (invisible decrease) in round/circle:

Take the front loops only for the next two stitches.

Yarn over through the first two loops.

Yarn over once again through the rest.

### How to do clean fasten off:

After you cut the yarn, insert the yarn into the second stitch after your last stitch.

Insert the yarn back into the last loop you've done.

Here is the result.
